About This Game

Rebuild Athens from the ashes of its destruction and secure the help of the Heroes of Olympus as you battle an evil god! Through addictive match three-gameplay and compelling city building interludes, you will gather gold, meet the needs of a ravaged population, and search for legendary lockets that will allow you to summon the gods and appeal to them for help. Two years in the making, Heroes of Hellas 3 is both a spectacular epic and a highly accessible casual game. Are you ready to meet the gods?

(Edited\Updated version)

Looking back at my previous review... I no understando myself. Anyway... Onto the review!

This novel is... Interesting to say the least. Fairly short. 2-5 hours (if you read all da text and ending stuffs) the concept of it I like. Wouldn't mind another novel like this. Maybe having multiple different stories or just a single novel.

The charactors however, are almost irrelevant in most of the novel. Since it's not drawn out or anything like that, I doubt he planned to make the charactors have more backstories\relevance in the story and make them a bit more important.

I personally like the art.

And that's about it. I can say this was one of the more enjoyable cheap novels. I give dis a 7\10.. **THIS GAME IS THE BEST GAME EVER!!!!**. A lot of the effects have not been working for me. After a YEAR there has been no reply or help for this problem! How can I enjoy a broken simulator? Spending minutes to place effects and not seeing them is utterly frustrating. I can not recommend this until it gets repaired. So far this sim has just been a waste of my €10,-. Garbage; avoid at all costs. Criminal to ask \$10.

Simply not fun, and it's easy to make the game unable to progress. For example, I was playing Emily not long after the second "boss" that just jumps around a lot. Entered an area blocked off by a shield of sorts and couldn't progress. I then couldn't get back out of the hole, as Emily was big enough to enter, but too big to leave.... This game makes me want to break the law. The textures and colors are so amazing I got lost in it for 7 hours the first day. You wont be disapointed. What are you waiting for? Buy it. Buy it now.

P.S. I had a bug where it continuously loaded forever, but I opted into the devbranch and launched it in Admin mode and it cleared it up.. Unbeatable (value for money)!

This is really fun. Was surprised there was no music, but that is easy to fix by turning on pandora.

I would love to see other particle options. Picking colors would be cool.

If this was developed more I would pay money in a heartbeat. Thanks for a great free demo!. Cute and elegant minimalist puzzle game ~. This was a pretty cute VN.

I wasn't actually expecting to learn things about Japan though.

There is a lot of information mixed in, from festivals to types of mochi to Comiket.

It would have been nice to see the routes taken a bit further, but it's still a nice story.

My only nit-pick is that there didn't seem to be any sound options, so at times the music would drown out the voice acting.

Oh, and the Neko mode was a nice touch.. Right now, at any point in the distant future when which this may be read, my steam browser will say that I've played this game for 74 minutes, the mean time to obtain whatever promotional trinket this game had to offer. Of those 74 minutes, the 73 I didn't spend pawing off my furry yiffstick to that effeminate dogman were spent with a block of ice cooling down my glowing red rocket. I've never met a dog I wanted to ♥♥♥♥ more than whatever the player character's name was.

The dealbreaker for me was that I found out the devs were aussies. alt-F4'd and uninstalled it on the spot. Its for the best, McGruff's Nightstick might've fallen off if I kept playing.. Awesomeness. Probably the worst hidden object game I have ever played. There is no story and no other puzzles than the hidden object minigames and these are very poorly executed. The graphics are low resolution and unclear, the objects don't respect realistic scale and sometimes are almost entirely covered by other objects.

There is a ton of other HO games way better than this one.

20%, not recommended.. This game is great and isn't getting the attention it deserves. It has a very intriguing story and an odd yet interesting setting. Corporate office with a horror/mystery isn't something I have come across before. I loved the art. It's a bit simplistic at times but I still get amazed by what people can do with pixel art. Most of the "background" office workers design's leave something to be desired, though I suppose it fits as the ARE just the mindless boring drones of the company. Music is pretty good and the sound design is top notch. Some of the sound design for the creatures sent chills down my spine. The game looks to have decent replayability as well as there are multiple endings and there are secrets and lore bits to find. I'll be starting a second playthrough to try and find the stuff that I missed. But I'll actually have to look myself as at the time of writing this there are hardly any walkthroughs, as stated before, this game hasn't yet gotten the attention I believe it deserves.

Its not without its problems though. As stated by others, there was a time where I honestly had, and still don't, know what I was supposed to do. Also on one part when being chased by a particular enemy the fear turned into tedium as you end up having to wait for it to pace before you can check things in the room.

Other than that I'd definitely recommend Yuppie Psycho. It's completely different idea than I've ever seen and I would like to see more like it in the future.. You know when you are told to "Get Good"? This game is that philosophy incarnate.

I admit this game needs players and some tweaks, Lag can really screw up your match, and it's kinda bad to be stuck looking at no one playing in any of the arenas.

the combat is... Interesting It's simple, yes with a few added key presses here and there but honestly, I've never felt that "that hit was BS" or that I was in the right, It felt fair, Granted some people are just that good but it's like... once in a while!

Granted players are needed and like I said the Lag issue is a thing, but you know... It has a Demo version now, so give that a go!

Titles on Greenlight:

Hi everybody,

We would like to remind that we have 2 titles waiting for your votes on Greenlight:

<http://steamcommunity.com/sharedfiles/filedetails/?id=515745207> - Rescue Team 5

<http://steamcommunity.com/sharedfiles/filedetails/?id=487214700> - Goblin Defenders: Battle of Steel'N'Wood
