I can't find the soundtrack! Yes, I have looked in the steam\steamapps\common it is not there. I've also tried right-click properties and "browse local files". It's not there. Very dissappointing that this is so difficult.. 6/10!

Fun game and very relaxing. The artwork in this game looks really nice. Would recommend to anyone who enjoys doing jigsaw puzzles.. I came to the comments to figure out what Nancy put in the time capsule.. you guys aren't much help XD. I have tried several times to use this. It is not intuitive at all. It sort of locks your mouse and screen like some kind of fullscreen application or video game. Also I had no way of getting it to show in streamlabs OBS and the app itself didn't read the chat from any of the 3 supposedly successfully connected sources (mixer,youtube and tiwtch) . I do not recommend this software at all. Save your money and time and Try a different solution.

Update 4V18V19 - Been using sheepchat and everything is a lot more intuitive Irecommend it over this.. The kind of tainted fairy-tale spectacle The Yawhg promotes sadly fades all too soon, despite the whimsically strong writing and the playful art that often hints at a slightly darker edge. For all its subtle melancholy and inventive storytelling, there's only a small window of time when all these things mesh together to create something special. After that, it's more about rediscovery and rehashing in the futile hopes that relevance can be found by combining the old and worn.

Amnesia without stealth but with guns, stupid monsters and lags.. I've played this game less than 30 minutes and stopped. It's very dark with no way to adjust gamma only shadows. There was absolutely no loot in anything that I searched. Honestly couldn't search anything because there wasn't a way to access any items in the game.... I could only pick up trash and cans. I could not punch either and therefore had no way to defend myself against the alien creatures. I constantly ran until my stamina ran out and then I died because I had no way to defend myself. I think that this game could have potential in the future, but how can we play it now when there is really nothing to interact with other than alien creatures that kick our butt because we have no way to defend ourselves... Just a thought, try and have fun playing.. This is a shmup (side scrolling) that looks like it's been made in Flash. It's not retro-pixel styled, which is about the only good thing going for it.

Controls are oversensitive and don't seem to have been optimised for keyboard. There's no graphics settings to speak of. What's worse, if you have a 4K monitor it will display with incorrect DPI settings... disabling that for compatibility makes the game run both pillarboxed and letterboxed in the middle of the screen.

If the developers can't be bothered with even basic testing to make sure the game displays properly on modern systems, I can't be bothered recommending people buy it.. gayish game... Can make a man gay. 10/10. Pretty fun overall. The game is pretty easy (especially if you spam Spiders), but the later levels provide some challenge.

Good casual game. 7/10.. I would love to have a computer version of Zooloretto to play with friends, but this has no multiplayer? Why on earth would you play a push your luck game against the computer?. WHY is the name of all that is beardly is there THREE of these "DLC's"?!

I said the first one was a waste of time and now we're up to THREE of these? Total and utter waste of time/disk space/bandwidth, do not download.

Make some real content for your game, This crap is cluttering up the "updated games" list for me.. This game, despite being in Early Access, has the polish and fun factor reminiscent of Nintendo games. Everything, from the lovely cartoonish visuals, to really enjoyable sound design. The game plays smooth and tight, and is just really, really fun to play. The best way I could describe it is a mix between Rocket League and sheshock, while only taking the best aspects of those games and turning it into a wonderful passion project. Overall, this is definitely worth picking up!. CropDuster Supreme was like a breath of foul air in my otherwise dull, odorless life. From behind a cloud of noxious gas it emerged, making me retch with laughter and joy. The concept is simple: you must use your flatulence to clear a succession of public places of all human life within a time limit.

There are three difficulties, and you must utilize your innate bacterial imbalance with the deftness of a truly stinking tactician. The fact you can buy this title and an accompanying burrito and have change from \$5 is also wonderful.

A suggestion for the developer: this is a perfect gift title between friends. So if you can implement a slightly discounted four-pack on the Store page, your stanky masterpiece may waft its way into many a personal space.
